Release v2.1 - 04.02.2025

- XPY-172 – Bugfix: Resolve typo by wrong getter to access message header.
- XPY-171 – Bugfix: Resolve typo related to cmdline option `'--fibonacci-input'` of example applications.
- XPY-162 – Bugfix: Increment of messaging error counter of multithreaded userapp examples.
- XPY-154 – Support of positional and/or keyword arguments passed to tasks when started.
- XPY-150 – Refactoring: detailed design and implementation of (limited) RTE modes.
- XPY-148 – Enable message sending in teardown-phase of tasks.
- XPY-134 – Rework output format of LC failures.
- XPY-125 – Provide framework start option `'--suppress-start-preamble'`.
- XPY-124 – Provide framework start option `'--enable-log-callstack'`.
- XPY-120 – Bugfix: Error logging not working after start of synchronous tasks.
- XPY-119 – Bugfix: Framework gets stuck if application missed to stop it before joining.
- XPY-115 – Make synchronous tasks may have cyclic run-phase, too.
- XPY-110 – Provide pre-defined error codes for errors reported by the framework.
- Total of 26 additional known and/or planned PM issues mostly related to stability.

TOC
